

Partnering with Prometheus

In-network services benefit everyone

Healthcare providers support partnering with Prometheus

In a recent survey, 9 out of 10 healthcare providers found the following to be important or very important*:

- Offering Prometheus testing as an in-network benefit
- Providing a full spectrum of specialty laboratory tests and limiting the number of times patients need to have their blood collected
- Notifying physicians immediately of abnormal test results and assisting with interpretation

PROMETHEUS[®]
Therapeutics & Diagnostics

For the person in every patient
