CPT CODES (as applied by Prometheus)	PROMETHEUS TPMT Genetics
81401	TPMT Genetics (genotype)

Laboratory Description

Prometheus Laboratories Inc. (Tax ID# 33-0685754 NPI# 1073642641) is located in San Diego, CA and licensed in several states including New York and California. This test was developed and its performance characteristics determined by Prometheus Laboratories Inc. It has not been cleared or approved by the U.S. Food and Drug Administration. Prometheus Laboratories Inc. is a CAP-accredited CLIA laboratory.

Test Description

PROMETHEUS TPMT Genetics classifies patients as one of three genotypes: homozygous normal (wild type), heterozygous or homozygous mutant. Because each patient metabolizes thiopurines differently, the efficacy and toxicity of thiopurines can vary widely from patient to patient. Knowledge of the TPMT genotype may; reduce time to response, allow physicians to individualize dosing, identify patients in whom thiopurine therapy should be avoided and help reduce the risk of leukopenia.

PROMETHEUS TPMT Genetics is performed only at Prometheus Laboratories Inc.

It is recommended that you provide all specific, applicable diagnostic codes. Specific diagnostic codes assist the payer in coverage determination.
